Saba M- 20201CCS0139

ABSTRACT

In this comprehensive paper, we present an advanced corporate network known as the CSR Portal. This groundbreaking platform serves as a catalyst for cooperative learning and teamwork, facilitating the exchange of operational insights, notable incidents, organizational duties, and CSR-related challenges within specific industries. The creation of the CSR Portal was a result of a challenging project that prioritized strong security measures to ensure confidentiality and data integrity.

The CSR Portal's primary interface is user-centric, fostering efficient collaboration and ease of use. Stakeholders can navigate through well-organized data columns with enhanced standard encryption for sensitive information using the web portal, which acts as a central hub for exchanging crucial information. The intuitive dashboard showcases CSR activities, innovative problem-solving techniques, verified NGO collaborations, and ongoing projects, providing stakeholders with a comprehensive perspective of the aggregate impact.

Designed with flexibility in mind, the CSR Portal is committed to staying at the forefront of technological advancements. Recognizing the dynamic nature of the CSR world, the platform is dedicated to adaptation and intends to implement Technology widely, showcasing a progressive stance in the face of swift technical progress. This forward-thinking approach goes beyond a technological fix and is reshaping corporate social responsibility through innovative tools and cooperative efforts.

ACKNOWLEDGEMENT

First of all, we indebted to the **GOD ALMIGHTY** for giving me an opportunity to excel in our efforts to complete this project on time.

We express our sincere thanks to our respected **Dr. Md. Sameeruddin Khan**, Dean School of Computer Science and Engineering, Presidency University for getting us permission to undergo the project.

We record our heartfelt gratitude to our beloved Associate Deans **Dr. Kalaiarasan C** and **Dr. Shakkeera L**, School of Computer Science and Engineering, Presidency University and **Dr. S.V Anandaraj**, Professor & Head of the Department, School of Computer Science and Engineering, Presidency University for rendering timely help for the successful completion of this project.

We are greatly indebted to our guide **Dr. G. Vennira Selvi**, Assistant Professor, School of Computer Science and Engineering & Information Science Presidency University for his inspirational guidance, and valuable suggestions and for providing us a chance to express our technical capabilities in every respect for the completion of the project work.

We would like to convey our gratitude and heartfelt thanks to the University Project-II Coordinators **Dr. Sanjeev P Kaulgud**, **Dr. Mrutyunjaya MS** and also the department Project Coordinator **Dr. Manasa**.

We thank our family and friends for the strong support and inspiration they have provided us in bringing out this project.
